TF Class Motif Counts

- C2H2 zinc finger factors
 - basic leucine zipper (bZIP) factors
- basic helix-loop-helix (bHLH) factors
- homeo domain factors
- nuclear receptors with C4 zinc fingers
- forkhead/winged helix factors
- tryptophan cluster factors
- Rel homology region (RHR) factors
- other C4 zinc finger-type factors
- STAT domain factors
- high-mobility group (HMG) domain factors
- MADS box factors
- paired box factors
- SMAD/NF-1 DNA-binding domain factors
- heteromeric CCAAT-binding factors
- basic helix-span-helix (bHSH) factors
- TEA domain factors
- p53 domain factors
 - N/A
- C2CH THAP-type zinc finger factors
- Runt domain factors
- Grainyhead domain factors
- T-box factors
- heat shock factors
- TATA-binding proteins
- ARID domain factors
- SAND domain factors
